## About kiuwan

Kiuwan provides **application security testing tools** to over 500 companies worldwide, including such recognizable names as Santander, AXA, Diners Club, BBVA, and Finessa.

Kiuwan was founded in 2012 with **headquarters in Madrid**, Spain. In 2018, we became a **division of Idera Inc.**, which helped expand our global outlook by adding offices in the US, Italy, and France.

Kiuwan is a part of **Idera, Inc.'s DevOpsTools business**, which also includes TestRail, Travis CI, Ranorex, and Assembla.
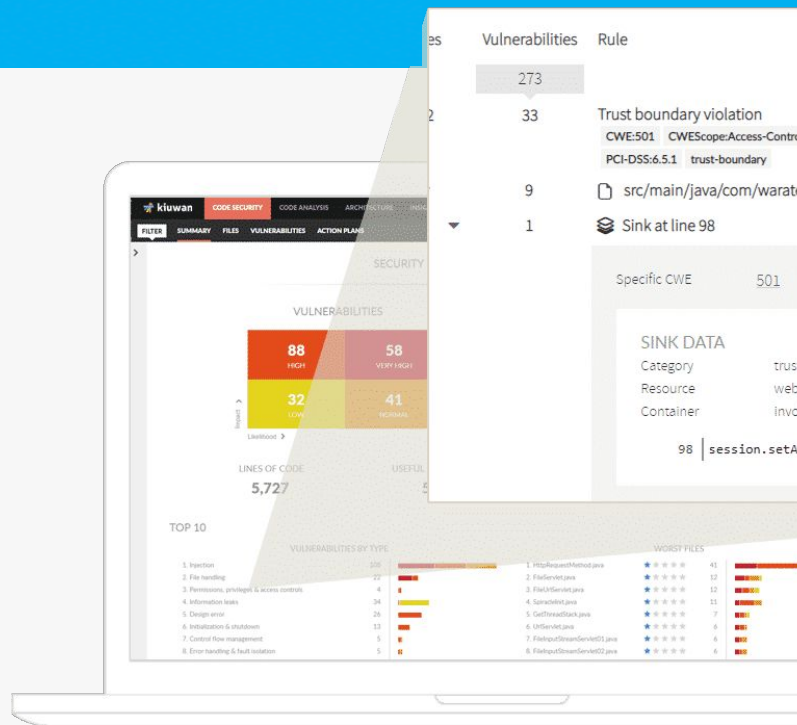

Did You Know…

The name Kiuwan is an Old German word meaning "**to chew**"?
That's because Kiuwan likes to "chew on" the source code to find vulnerabilities!

Our Mission

Our mission is to offer the **most comprehensive solutions for application security**.

Kiuwan application security solutions help our customers improve application security, offering features that **empower both executives and developers** with state-of-the-art security and advanced business analytics.

Our clients welcome the **transparency and complete scope** Kiuwan grants them in terms of solving the risks and threats that affect their productivity, management, life cycle, and governance of their application portfolio.

Our Solutions

Kiuwan Code Security (SAST)

Static Application Security Testing

Kiuwan Code Security automatically scans application code to identify and remediate vulnerabilities. It is **compliant with the most stringent security standards**, including CWE, OWASP, and SANS. It covers **30+ programming languages** and integrates with leading IDEs and DevOps tools.

Kiuwan Code Security helps organizations achieve their goal of building security into **every step of the DevOps process**.
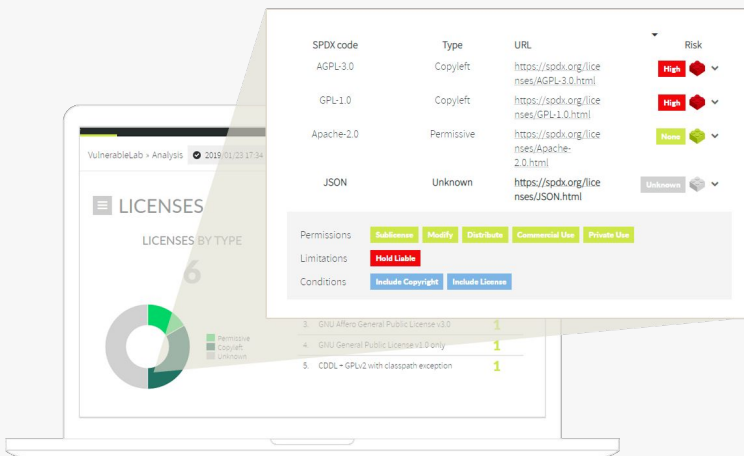

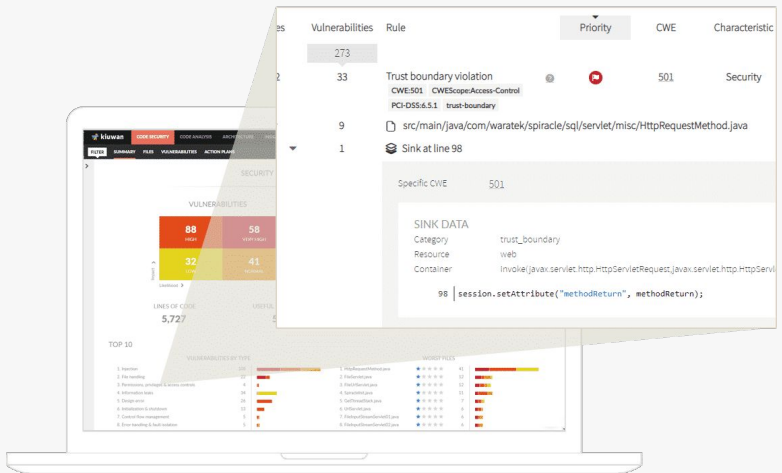

Kiuwan Insights (SCA)

Open Source Risk Management

Kiuwan Insights helps identify and manage vulnerabilities, compliance, and operational risk from using **open source components**.

With Kiuwan Insights, development teams can remediate vulnerabilities and ensure licensing compliance.
